

Check Printing: Secure, Cost-Effective Business Check Printing Services

The Pain of Printing

Even when a business uses ACH origination to pay vendors, some just can't or won't accept electronic payments. That means paper checks must remain as part of a company's accounts payable payment mix, and check printing is a costly and time-consuming process for businesses.

The cost includes postage, envelopes, check stock, MICR ink, maintaining the printer, and the time used for printing, addressing, and stuffing envelopes.

Those expenses can add up quickly, making it a great opportunity for outsourcing this non-core activity.

A Better Option

JHA Business Payment Solutions offers check printing with simple implementation and an easy-to-calculate ROI. Here are four simple steps for check management:

1. Upload a check file to us via secure FTP
2. We validate the file, providing automatic error notification
3. We monitor the check printing to ensure completion
4. Items are mailed the next business day, each weekday except federal holidays

How It Works

All you need is the ability to output a standard check information file. You can create a batch of checks for multiple business customers each day and upload once. A smart template allows for signatures and has options for reporting account or invoice information. Checks are drawn on the business customer's account and no funds change hands.
