

JHA SmartPay Commercial MobileSM: Mobile Check Deposit for Business

Are You Offering What Your Customers Need?

Today's businesses conduct more and more of their activities using smartphones and tablets. Your ability to attract, serve, and retain these customers depends on giving them the modern payment solutions they need to grow and compete.

Did you know there were 17.8 billion checks processed in the U.S. in 2015, or that 80% of all payments for small and medium sized businesses are made by check? Paper checks represent a huge logistical challenge for your customers. Processing those checks requires a laborious, time-consuming, multi-step procedure.

Whether you serve small, on-the-go business owners, or businesses with field reps, technicians, or delivery personnel, JHA SmartPay Commercial Mobile is ideal. It enables your customers to deposit checks with their mobile devices immediately upon receipt, not waiting hours or days for the checks to arrive at the main office. Imagine the advantage offered your customers when they can drastically shorten the time it takes to turn checks into cash. Imagine the increased efficiency when you eliminate their need to chauffeur checks to the office and then the bank.

Make It Easy

JHA SmartPay Commercial Mobile provides an immediate deposit option by phone or tablet. There is no waiting, and no shuffling of paper. This solution integrates with your existing mobile app, or operates as a standalone, white-labeled solution. It's an ideal, low-cost solution for small business owners or businesses with remote field personnel.

Mobile Deposit Options and Features

- Supports multiple users, each with their own individual login credentials
- Enables deposit of more than one check at a time
- Allows deposits into multiple accounts
- Provides audit trails and detailed reporting
- Allows checks to be associated with customer account data

Serve Customers and Stay Ahead of the Competition
